GMAT CRITICAL REASONING

In years past, professional baseball players lifted weights less but were also injured less often during games. Obviously, the more an athlete lifts weights, the higher the likelihood of injury.

The argument above depends on which of the following assumptions?

- (A) The increase in baseball injuries is due to a factor other than weightlifting.
- (B) The activities of baseball players represent those of athletes as a group.
- (C) Most baseball injuries today result from too much weightlifting.
- (D) There is no proven correlation between how much athletes lift weights and how likely they are to be affected by injury.
- (E) Weightlifting has always been common practice for professional athletes.

- A Statement (1) ALONE is sufficient, but statement (2) alone is not sufficient.
- B Statement (2) ALONE is sufficient, but statement (1) alone is not sufficient.
- C Both statement TOGETHER are sufficient, but NEITHER statement ALONE is sufficient.
- D EACH statement ALONE is sufficient.
- E Statements (1) and (2) TOGETHER are NOT sufficient.

HOW TO PREPARE

Three components of your success in GMAT / GRE

1

Foundation: Knowledge

- Learn the subject matter
- Understand the types of questions
- Learn strategies and techniques for each type of question

2

Practice: Accuracy

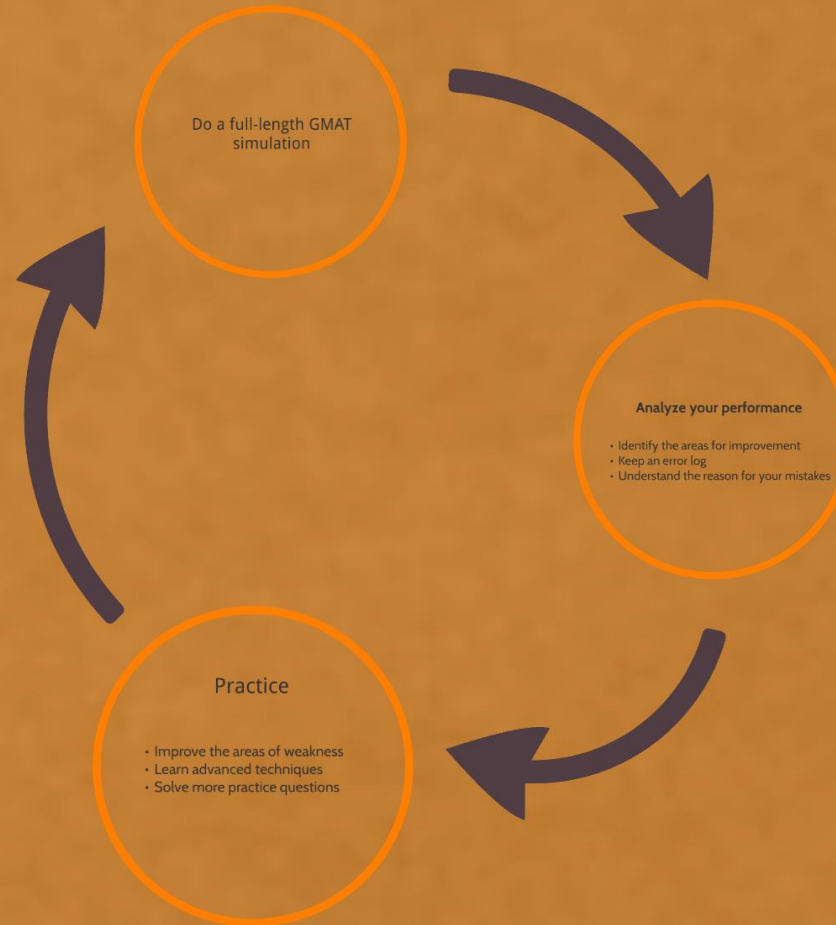

- Make a study plan
- Apply what you have learned on hundreds of practice questions
- Measure your progress

3

Grind: Speed

Take several full-length simulations in the conditions as close to the real environment as possible

Discipline beats class

YOUR STUDY PLAN

1. Identify your target score and your deadline.
2. Don't forget to include 15 business days to get the official score.
3. Familiarize yourself with the contents of the test
4. Do a free simulation from mba.com or ets.org.
5. Based on the results of your simulation, identify the areas for improvement
6. Allocate regular time slots for preparation. The worst strategy is to study whenever you have some time.
7. Keep an error log
8. Do at least 3-4 full-length simulations before the actual exam
9. Analyze the results and identify what needs to be improved. Repeat
