

FAKE NEWS AND ARTIFICIAL INTELLIGENCE

Comune
di Bologna

Tavolo Europa
Bologna meets the EU

Digital Citizenship Programs Between Bologna and Münster

We live in an era where Artificial Intelligence can create news, images, and videos indistinguishable from reality. But who decides what is true? And how can we safeguard the quality of democratic debate?

This workshop gives you the opportunity to understand, analyze, and propose concrete solutions to combat disinformation, working in teams and engaging directly with institutions. Participate in the international policy challenge between Bologna and Münster and develop a concrete proposal.

A project funded by

Ministero degli Affari Esteri
e della Cooperazione Internazionale

WORKSHOP 1

📍 Tuesday, April 14, 2026 | Duration: 4 hours

- Information session on disinformation and AI
- Case study analysis
- Policy Lab: developing policy proposals

WORKSHOP 2

📍 Tuesday, April 28, 2026 | Duration: 2 hours

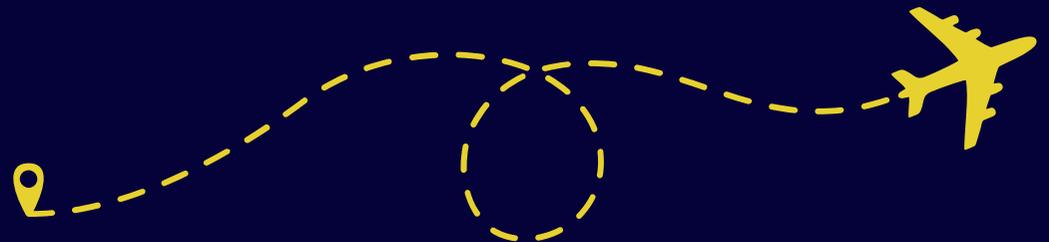

- Presentation of the proposals developed by the Italian and German groups
- Direct discussion with an institutional committee (Administration, Tavolo Europa, and German partners)

WHY PARTICIPATE

- Advanced skills in AI and disinformation
- Practical experience in policy design
- International exchange with German students
- Direct dialogue with local institutions
- Certificate of participation from the Municipality of Bologna

PRIZES

- The three winning groups will present their proposals to the institutions of Bologna.
- The winning group will participate in a three-day exchange in Münster (late August 2026).
