

Think space and win a trip to Beijing!

Are you 18 to 35 and want to make your mark on the space sector?

The Space Generation Advisory Council, in cooperation with committees of the International Astronautical Federation, is presenting competitive opportunities for students and young professionals to attend the Space Generation Congress and International Astronautical Congress to be held in Beijing, China, this September.

Winners of these competitions will present their papers at both conferences and receive scholarships toward travel and conference costs.

SGAC challenges you to tackle Near Earth Objects, and the threats and opportunities they pose. Tell us how to detect, deflect, explore, or commercially exploit an asteroid heading toward Earth. Submit a paper on your idea by **June 30** for your chance to win.
