

Courses that appear inactive in the Course Structure Diagram for the a.y. 2025/26

In response to requests received regarding the activation of certain courses that appear inactive in the Course Structure Diagram, clarification is required. With the recent change in regulations made necessary by the new Ministerial Decree 1649/2024, the degree program has undergone a change in structure and a consequent change in the degree program code. Therefore, from a technical point of view, the second-year courses under the new code are not active if they are only present in the second year. For information about the course program, please select the academic year 24/25. The problem does not affect other courses, as they are also active in the first year and are carried over to the 2024/25 academic year cohort, which will be in its second year in 2025/26.
