TEACHING REGULATIONS OF THE MASTER DEGREE

LM-54 [PHOTOCHEMISTRY AND MOLECULAR MATERIALS]

Bologna Campus

INDEX

ART. 1 ADMISSION REQUIREMENTS

ART.2 MOBILITY AMONG THE COURSE PATHS

ART. 3 INDIVIDUAL STUDY PLANS

ART. 4 IMPLEMENTATION OF LEARNING ACTIVITIES AND TYPES OF TEACHING ACTIVITIES

ART. 5 ATTENDANCE AND PREPARATORY ACTIVITIES

ART. 6 FLEXIBLE STUDY PLAN

ART.7 ASSESSMENT OF LEARNING ACTIVITIES

ART. 8 ELECTIVE LEARNING ACTIVITIES

ART. 9 CRITERIA FOR THE RECOGNITION OF CREDITS ACQUIRED IN DEGREE PROGRAMS IN THE SAME CLASS

ART. 10 CRITERIA FOR THE RECOGNITION OF CREDITS ACQUIRED WITHIN DEGREE PROGRAMS IN DIFFERENT CLASSES, FROM TELEMATIC UNIVERSITIES OR INTERNATIONAL DEGREE PROGRAMS

ART. 11 CRITERIA FOR THE RECOGNITION OF EXTRA-UNIVERSITY COMPETENCIES AND SKILLS

ART. 12 INTERNSHIP

ART. 13 FINAL EXAMINATION

Second Cycle Degree Program in Photochemistry and Molecular Materials

ART. 1 ADMISSION REQUIREMENTS

- **Entry requirements**

Admission to the 2nd cycle degree program is subject to the possession of a 1st cycle degree, or other suitable qualification obtained abroad.

Moreover, admission to the 2nd cycle degree program is also subject to the possession of the following curricular requirements:

a) The possession of a 1st cycle degree in one of the following classes:

- ex D.M. 270:

☐ L-27 Chemical Sciences and Technologies

- ex. D.M. 509/99:

☐ L-21 Chemical Sciences and Technologies

- Previous degree program system (before D.M. 509/99): Degree in Chemistry or in Industrial Chemistry
- Any other degree obtained abroad that is recognized by the Second Cycle Degree Board as equivalent to the previously listed degrees.

b) If the degree obtained is different from the above-mentioned ones, the candidate should have obtained at least 60 CFU in basic scientific learnings (CHIM/01 to CHIM/12, BIO/10 - BIO/11, ING-ND/22 to ING-IND/27). A good basic knowledge of physical chemistry is also required: this knowledge will be evaluated mainly on the basis of the curriculum (1st cycle or five-year degree and programs) and on the content of the related courses.

c) Students with a foreign degree should possess a title that is recognized equivalent to those described in points a) and b). The evaluation will be conducted accordingly to procedures defined annually by the Board.

Admission to the master's degree programme is also subject to the assessment of students' personal knowledge which will take place according to the procedure defined in the paragraph "assessment of personal knowledge".

English language knowledge at B2 level (European classification) is required for the admission to the Degree programme.

- **Assessment of personal knowledge**

The assessment of the suitability of the personal knowledge will be carried out by the Admission Programme Board through the analysis of the curriculum which may be followed by an English interview, according to the methods, criteria and procedures established by the Degree Programme Board and published on the University website.

Knowledge of the English language at B2 level is required for the admission to the Degree Program.

Students who previously attended 1st cycle degree courses for which the official language of instruction is English, and English native speakers are exempt from presenting the certificate about English Language proficiency.

ART. 2 MOBILITY AMONG THE COURSE PATHS

The master's degree programme in Photochemistry and Molecular materials is divided into course paths.

Students may choose from the courses available in the course structure diagram, following the methods indicated in the structure itself and in the terms published on the University website.

Mobility among the course paths is allowed, following the deadlines published on the University website.

ART.3 INDIVIDUAL STUDY PLANS

Students will be allowed to present individual study plans according to the methods, deadlines and criteria published on Unibo web site. The individual study plans, approved by the Degree Programme Board, must be compliant with the teaching regulations and the guidelines defined by the competent bodies.

If students choose teaching activities that are activated in degree programmes with restricted access, the choice must also be authorized by the concerned Degree programme boards, based on criteria previously defined.

ART. 4 IMPLEMENTATION OF LEARNING ACTIVITIES AND TYPES OF TEACHING ACTIVITIES

The enclosed teaching plan indicates all the learning activities and their division into hours of classroom teaching, practical exercises, or internship, as well as the type of teaching methods.

Any further information will be published annually on the University website.

ART. 5 ATTENDANCE AND PREPARATORY ACTIVITIES

Compulsory attendance of teaching activities is indicated in the attached teaching plan, together with any preparatory activities involved in the individual learning activities.

The methods of compulsory attendance and any verification thereof are laid down annually in the study program during the presentation of the teaching plan and are notified to the students prior to the start of the program on the University website.

ART. 6 FLEXIBLE STUDY PLAN

Students can opt for flexible study plans, which allows to complete the 2nd cycle degree course in a longer or lesser time with respect to the normal number of years, according to the rules defined within the University Teaching Regulation.

The teaching activities of the study program can be replaced, in case of forced deactivation, by other activities, in order to guarantee quality and sustainability of the educational courses on offer.

ART. 7 ASSESSMENT OF LEARNING ACTIVITIES

The attached teaching plan indicates all cases in which the learning activities end with an exam, marked with a score out of 30, or by a simple "pass" when the necessary competencies have been acquired. The assessment methods are laid down annually by the Degree Program during the presentation of the teaching plan and notified to the students prior to start of the program on the University website.

ART. 8 ELECTIVE LEARNING ACTIVITIES

The Degree Programme Board considers all the learning activities defined by the Degree Programme Board and listed in the annexed Teaching Plan consistent with the teaching project.

If a student intends to attend one learning activity that is not included in the previewed list, she/he must submit a request to the Degree Programme Board within the deadlines and conditions published on UniBo web portal.

The Board shall verify the coherence of the request with the student's own study plan.

ART. 9 CRITERIA FOR THE RECOGNITION OF CREDITS ACQUIRED IN DEGREE PROGRAMS IN THE SAME CLASS

The acquired university credits are recognized from a half up to the number of credits indicated for the same subject group laid down in the degree program teaching regulations, in compliance with the relative subject area and the type of learning activities.

If, after having evaluated and accepted the credits according to the provisions of this regulation, there remain unused residual credits, the Degree Programme Board may also accept their validity, after assessing each specific case on the basis of teaching and cultural affinities.

Recognition refers to course units delivered or learning activities undertaken in English.

ART. 10 CRITERIA FOR THE RECOGNITION OF CREDITS ACQUIRED WITHIN DEGREE PROGRAMS IN DIFFERENT CLASSES, FROM TELEMATIC UNIVERSITIES OR INTERNATIONAL DEGREE PROGRAMS

The acquired credits are recognized by the Degree Programme Board according to the following criteria:

- analysis of the course contents
- assessment of the coherence of the scientific-disciplinary fields and the contents of the learning activities

in which the student has acquired the credits with the specific learning outcomes of the study program and the individual learning activities to be recognized, in any case pursuing the aim of promoting student mobility.

The credits are recognized up to the maximum number of university credits provided for the program, as laid down in the degree program teaching regulations.

If, after having recognized the credits according to the provisions of this regulation, there are unused residual credits, the Degree Programme Board may recognize them by assessing the specific case in coherence with the teaching and cultural affinities.

Only teaching or training activities held in English may be recognized.

ART. 11 CRITERIA FOR THE RECOGNITION OF EXTRA-UNIVERSITY COMPETENCIES AND SKILLS

Competencies acquired outside the university may be recognized in the following cases:

- professional knowledge and skills certified under the terms of the applicable laws;
- competences and skills acquired in post-graduate learning activities run or planned by the University.

The request for recognition shall be assessed by the Degree Programme Board considering the indications of the academic bodies and the maximum number of recognizable credits laid down in the study program Teaching Regulations.

This recognition is subject to the activities being coherent with the specific learning outcomes of the study program and the learning activities which are recognized, also in consideration of the contents and duration in hours of the implemented activity.

ART.12 INTERNSHIP

The master's degree programme includes a compulsory internship for the purposes of preparing the dissertation or in any case linked to a project aiming to develop learning and academic skills.

The internship must be carried out in compliance with Unibo Training Regulations or International Mobility Programmes for Traineeships rules.

These learning experiences shall not exceed 12 months and shall be completed by the date of graduation; learning credits may be awarded for these activities:

- included in the quota for the final examination;
- for the internship activities laid down in the course structure diagram;
- for elective activities counting towards the internship;
- for additional activities if the number of credits exceeds the one required for graduation.

ART. 13 FINAL EXAMINATION

- **Final examination characteristics**

The Final examination consists in the preparation and public discussion of a dissertation written in English and prepared under the supervision of a tutor, who is usually a professor of the Degree Programme. The thesis of the second cycle degree program in "Photochemistry and Molecular Materials" has original and experimental character and is linked to a project or an internship.

The dissertation shall demonstrate critical abilities and communication skills and provide elements of originality.

- **Final examination criteria**

The final examination is public and consists in the presentation, in front of a Final Examination Board, of a thesis written in English and in the discussion of the related experimental work.

The Board must ascertain the student ability to work independently, to describe and discuss clearly and autonomously the results obtained in the research project. The Board expresses its final assessment with a grade out of one hundred and ten, and comprises a general evaluation of the student's curriculum.

The Faculty- Student Joint Committee gave a favorable opinion on the consistency of the credits assigned to each teaching activity and its learning outcomes pursuant to Art. 12, par. 3, of Ministerial Decree 270/04.
