

Double degree program – Selection criteria

Students enrolled in the Data Science curriculum can apply for joining the double degree program with the Università della Svizzera italiana. Since this program has a limited number of positions, applicants will be selected according to a ranking.

The selection procedure will take place during the first year, at the end of the first semester. At that time, students could have obtained 24 ECTS (20 ECTS from courses with marks).

The selection criteria are the following:

1. In order to be admitted, students must have obtained at least 10 ECTS.
2. Students are ranked according to the career evaluation provided by Erasmus office.
3. In case of ties in the career evaluation, the student with the highest level of English proficiency will be preferred.
4. In case of ties in the in the English proficiency level, the youngest student will be preferred.
