ReUniOn

ReUniOn is the first world reunion of University of Bologna Alumni. It is the only event in Italy that rallies all alumni of the world's oldest university to start a knowledge festival.

Reunion is a three-day event for talking about history, current events and the future. It emerges from the Alma Mater's desire to find and embrace its students once again, and to say "thank you" for having become ambassadors of the University of Bologna in Italy and around the world. It is an opportunity for alumni to relive the excitement of those years, to look up coursemates, re-discover the important places of their university life and share memories with their families.

The University of Bologna was founded in the 1088 and it is the most ancient university of the western world. After 927 glorious years, this year the Alma Mater will finally celebrate the Italian University Institution, pointing out its own characteristic fundamental principles as the internationality, innovation and the social formative character.
