II. DETAILS OF THE PROPOSED TRAINING PROGRAMME ABROAD

Host organisation: Ghent University
--

Planned dates of start and end of the placement period: from <u>1/4/2013</u> till <u>1/7/2013</u> , that is 3 months
--

- Knowledge, skills and competences to be acquired:

Technical skills (molecular microbiology, flow cytometry, statistics, ...) and complementary skills directly related to the research (e.g. project design, sampling techniques, analytics).

- Detailed programme of the training period:

In this project, we will use straightforward approaches using in vitro "synthetic ecosystems" to test new microbial ecological hypotheses. In the in vitro synthetic ecosystems, different levels of microbial interactions and complexity will be assembled using relevant mixtures of isolated species from culture collections. Since these species are well characterised on a physiological and genomic level, their interactions can be studied in detail using a portfolio of molecular techniques.

- Tasks of the trainee:

Setup and analysis microbial communities in microcosms.

- Monitoring and evaluation plan:

The student work is monitored by weekly reports during all internship period.

The student presents a written report of min. 20 pages and presents the report orally in front of a jury at the end of the internship (15 ECTS).
