

“HEALTH AND SAFETY IN WORKPLACES” – TRAINING COURSES FOR STUDENTS

Courses in Health and Safety in workplaces are mandatory for **all students which carry out activities in University of Bologna laboratories** (teaching activities, internship or thesis work), on the base of the Italian Law (Article nr. 2 and nr. 37, Text Law nr. 81/08).

Workers Training is composed by two parts, a “General Training” and a “Specific Training” on the risks related to working activities and to work environments.

General Training and the first part of the Specific Training are provided in [e-learning](#) as “*Module 1 – Safety General Training*” and “*Module 2 – Safety Specific Training (Part 1)*”.

Online modules accomplishment provides a certification, both in Italian and in English.

“Module 1 – Safety General Training” and “Module 2 – Safety Specific Training (Part 1)” provide a Worker Training adequate only for “Low Risk” working activities.

Students and workers involved in teaching and research activities in the Laboratories **must attend** a second course on specific risks in work environments, the “**Module 3 – Safety Specific Training (Part 2)**”. This course is not available in e-learning.

Students of all the engineering degree programs in Forlì (including old degree programs) **must attend the full training** (all the three modules).

Registration to “*Module 3*” must be entered on the “[Students OnLine](#)” platform (personal login credentials are required): available courses are published in the “Booking” section.

“Module 3” – Courses scheduled in Forlì

28.06.2019, h 9 – 13

Classroom nr. 4 in the teaching building (via Fontanelle 40)
(online registration is available until 27.06.2019)

IMPORTANT REMARKS

General Training module provide a no expiring certification, which is recognized in private and public companies in Italy, whereas **Training on Specific Risks (part 1 and 2)** certifications expire after 5 years.

On the base of the University of Bologna “Internship Regulation”, General Training must always provided by the University, even if the internship activity is carried out in external companies.

More information about the e-learning training modules are available at the page “[Online courses on Health and Safety in study and research areas](#)”.

Information about typical risks in teaching and research activities are provided at [this page](#) (the page is available only in Italian).
